## About This Project

This project presents a **Heart Disease Analysis Dashboard** aimed at understanding major risk factors influencing cardiovascular health. Heart disease remains one of the leading causes of death worldwide. Through interactive data visualization, this dashboard highlights patterns related to:

- Age distribution
- Gender comparison
- Blood Pressure levels
- Cholesterol impact
- Diabetes-related risks

**Tools Used:**

- Flask (Python Web Framework)
- Bootstrap (Responsive UI Design)
- Tableau Public (Data Visualization)
